- Python (Numpy, Pandas)
- MS Excel
- SQL
- Power BI
- Statistics
- HTML & CSS

LANGUAGES

- English
- Hindi

PROFILE

I am Harshita Soni, an aspiring Data Analyst with a strong foundation in data analysis and visualization using Python libraries such as Pandas, NumPy, and Matplotlib. I also possess hands-on experience in frontend development with HTML and CSS. Known for my strong problem-solving abilities and effective communication skills, I enjoy translating complex data into clear insights that support decision-making. I am passionate about continuous learning and eager to contribute to data-driven projects in a dynamic and growth-oriented environment.

PROJECT

1. Sales Data Analysis using SQL
Tools: MySQL, Excel
Designed and executed complex SQL queries to analyze sales trends over a 12-month period.

2. Business Dashboard using Power BI
Tools: Power BI, DAX, Excel
Created an interactive dashboard for a retail company to visualize KPIs such as revenue, profit margin, and customer acquisition.

3. Data Cleaning and Visualization with Python
Tools: Python, Pandas, Matplotlib, Seaborn
Built a Python script to clean and preprocess a raw dataset containing customer feedback and purchase records.
